**Tire Size:** 165/80 R 13  
**Width:** 1750 mm  
**Length:** 3100 mm  
**Weight:** 160 kg  
**Flatbed:** 11180 x 1930 mm

# REFRIGERATED TRAILER

Since our trailers with high thermal insulation contain XPS material in their structures, they are suitable for the transportation of many types of food, including meat and meat products, dairy products, frozen foods and dry foods.

It is produced in a very robust structure against both external factors and chemical hazards and is often preferred due to this feature. Plywood wooden marine tree is used on the ground floor of our product, which is durable for four seasons.

## Standard Features:

- ST52 quality high strength steel chassis and body
- German torsion axle
- German tongue with a capacity of 3500 kg
- Heat insulated 1.8mm FRP coated 40mm XPS panel body
- Stainless frame
- Imported door locks
- 18mm plywood flooring
- Hot dipped galvanized steel body
- Extra protection for the electrical installation
- Extra strength thanks to 8.8 quality, galvanized bolts and fiber nuts
- Optimum trailer height
- Injection plastic mudguards
- LED Lighting group
- Reflector groups
- Height adjustable front support wheel
